Projects

Oh, The Places We Will Go!

Project team leader for a web app that helps people find things to do locally or when visiting another city. People can “shop” images of POIs around their location of choice and get more information if something looks interesting. Tech: HTML/CSS, JavaScript, jQuery, Bootstrap, Google Maps JS API, Google Maps Geocoding API, Google Places API, Google Static Maps API, Weather Underground API, Foursquare API

Self Started

A full stack web platform to allow students to come together and work on projects, and build great portfolios. Site incorporates secure sign-in, ability to post projects, search for projects to join, search for talent to invite to the user’s projects, and individual and group messaging. More features in the works. Tech used: HTML/CSS, JavaScript, NodeJS, Express, AngularJS, MongoDB with Mongoose ODM, UI Bootstrap, Passport-LinkedIn, other NPM packages (Body-Parser, Cookie-Parser, Express-Session, Morgan), LinkedIn API

17 Additional Projects
